

## We Are Here For You

For more than 70 years, Wesley has been a constant in our community. We've been here with the programs and services you need, always offered at your convenience. Now more than ever, we are here for you. Despite COVID-19, you can still safely receive the quality healthcare you've come to expect.

We can support you and meet your healthcare needs while keeping you safe at home, with our new telemedicine visits.

This means that we will schedule a *video visit*. You can use your cell phone, tablet or computer to complete this visit. The connection is secure and all of your health information is protected.

You will have access to the same health care provider that you typically see in person. They will evaluate you as they would in person and are able to provide you with professional advice as well as order tests and medications as appropriate. Video visits are a safe, convenient option that eliminate risks associated with infection exposure as well as the need for transportation, childcare during visits, and other potential barriers.

There is no additional charge for this new technology and it is covered by Medicare, AHCCCS and most insurers.

We also understand that some visits require in-person attention. If necessary, we can also see you in person at either of our health center locations. We are following the most current recommendations in screening and sanitizing to help ensure your safety.

Now, more than ever, we are here for you with Telemedicine or in-person visits. Call now (602-257-4323) to learn more about Telemed or to schedule a visit.
